Credit card:  Visa  Mastercard  Amexco  Diners

Card number: \_\_\_\_\_ Expiry date: \_\_\_\_\_

Name of card holder: \_\_\_\_\_

Please send an invoice

Place and date: \_\_\_\_\_ Signature: \_\_\_\_\_

## About IABSE

The International Association for Bridge and Structural Engineering was founded in 1929. Today, it has about 4000 members in 100 countries. The mission of IABSE is to promote the exchange of knowledge and to advance the practice of structural engineering worldwide in the service of the profession and society.

To accomplish its mission, IABSE promotes cooperation among individuals and groups concerned with structural engineering and related fields. It encourages the awareness of structural engineers about the needs of society and the environment.

For these purposes, IABSE:

- organises conferences, by itself or with other organisations
- publishes the journal *Structural Engineering International (SEI)*, as well as conference reports and other monographs
- presents annual awards for achievements in research and practice that advance the profession of structural engineering.

## Membership information

An individual member having residence in a country with an annual gross domestic product per capita below US\$ 5'000 may request a reduction of his membership fee (minimum fee). The same applies to a collective member having its seat in such a country.

Membership benefits include:

- subscription to the quarterly journal, *Structural Engineering International (SEI)*, in print and online (Individual: 1 copy; Collective: 2 copies)
  - online access to SEI back issues since 1991
  - monthly electronic newsletter
  - reduced prices on IABSE publications
  - reduced fees at IABSE conferences
  - access to Membership-Directory online
  - the opportunity to participate in IABSE Committees and Working Groups
- IABSE National Groups may review applications for membership

## Structural Engineering

Structural Engineering is the science and art of planning, design, construction, operation, monitoring and inspection, maintenance, rehabilitation and preservation, demolishing and dismantling of structures, taking into consideration technical, economic, environmental, aesthetic and social aspects. The term "Structures" includes bridges, buildings and all types of civil engineering structures, composed of any structural material.

## President of IABSE (2010–2013)

Predrag Popovic, USA

## Executive Director

Ueli Brunner, Switzerland
